Hi Mike- I did enjoy the holidays with family. I hope you did as well.

We are on an expedited schedule for developing the evaluation scope so I very much appreciate you making the effort to come in earlier with your stakeholders.

I will run this date and time past our key folks and see if they are available and, if not, what alternate dates and times work.

Best,

-Robert

Robert, I hope you had a great break over the holidays.

Sorry for the delay in coming back to you with a specific time. I will be having a call with my member company folks tomorrow afternoon, so I can't confirm this just yet, but the suggestion has been made that perhaps January 12 (say from 9 to 10:30) might be an option for a meeting. All our company folks have to travel to make this meeting, so if you could let me know if that date works, that would be helpful in getting a confirmation. If there are other days/times that are options for you, can you let me know? Thanks again. Mike

Mike-

Happy Holidays to you.

When we last spoke we discussed having a meeting in mid-January or possibly later in the month with the chlor-alkali folks. We are looking to complete our use data gathering in the next few weeks. We would really like to meet with folks the **week of 1/9**, if possible. If you are able to get your folks in that week, it would help us push forward with the schedule we are working with as the first part of developing our evaluation scope.

Best,

Robert T. Courtnage
